Chicago, IL 60651

&

Ken Bieda
4609 S. Keeler
Chicago, IL 60632

Apollo -13 added many new stations and cachets for collecting. The pages of illustrations elsewhere in this edition show most of the new cachets. This to me means that the stations are more aware of the people who come across their mail and wish to make known their important role in space communiastions.

Reports were very good on what covers were received for this flight. They all helped to complete the report. However there were no reports for E-6 and M-6 which I'm sure will come in sooner or later.

kenBieda aws good enough to make up the pages on illustrations of recovery ship cancels & Manned network cachets. Also THANKS to the following for sending in reports and information. Some of thses collectors writs to me faithfully with very little , if any , mail from me. I thank them and apologize for ~~nog~~ not writting, but time is not on my side, it seems.

Matylewicz, Frasketi, Ekas, Eismont, Rothgiesser, Langlois
Martin, Whitworth, Rose and Steinberg.

I also wish to thank the many who sent in donations which helped to make possible the printing and mailing of this edition.

From time to time more stations are coming into existance, like the communications stations at Buitrago, Spain and Kuwait. No addresses for these have been reported. If anyone comes across information on these or other stations please pass along to the rest of us.

##########

From Joe Frasketi at (E-1) - Bahamas - For Apollo-13 457 covers were serviced and postmarked April 14. Also 245 covers (same cachet) but blue) with words "Moon Landing Cancelled" mailed for thise ,who requested moon landing cancel & late comers. Tho tho these were mailed in time the postoffice held back and cancelled them April 20.

Vic Craft, who designed the Apollo-12 astronaut crew emblem , also designed the cachet I used.

There are still many collectors who do not know or disregard the fact that the NASA tracking station at Grand Bahama (M-11) is closed. They are in process of dismantling now. About 50 - 75 collectors sent in, mostly German. Some were cancelled here (E-1) and some were sent to Astronaut Trail sta. in Fla. Please send no more covers to M-11.

##########

NASA tracking station at Antigua (M-14) is closing. Long before Apollo-14 comes around it will be closed. No word on the ETR station on Antigua (E-4).

APOLLO-13 COVERS REPORTED AS RECEIVED

All station numbers refer to Bob Ekas' list of stations. This listing is not of stations that took part, but only a record of what has been reported to me. All covers postmarked April on date shown.

AUSTRALIAN REPORT

This is a report on some of the Australian tracking stations. Their role is ever expanding in the Space venture and a great source for covers.

M-7 NASA Carnarvon - It was the station that helped Apollo-13 down
S-8 Orroral Valley - Important in going in and put of orbit.
C-19 Moree - In-between relay communications centre.
C-20 OTC Carnarvon - Nerve centre on the West coast.
C-21 OTC Paddington - Nerve centre of communications.
C 32 Otc Ceduna - New station, important for comm. TV via satellite Indian ocean. Transmitting from or to Europe.
O-13 Woomera - Optical tracking station.
T-16 Narrabri - Upper space research station.
T-17 Culgoora - Solar radio observatory.

= =

Bay Stamps - Box 133 - Glenelg 5045 S. A. - Australia

Bay Stamps reports some stations did not service covers. Most were co-operative and some fine covers resulted. Plans are in for full color cachets and better grade envelopes for next Apollo launch.

For next Apollo, IMPORTANT, Please send only Bank notes as exchange fees are very high between Australia and other countries. Send all orders at least one month in advance of launch via Air mail.

PRICES: All stations - .38¢ each
Apollo Bay and Buckland Park - .30¢ each.

I also must have peelable labels for your covers. I will supply the envelopes and postage here.

There were 29 different stations that I serviced covers for Apollo-13. A lot of requests came in too late for me to send directly to the stations. For these late comers I will be sorting out what covers I have gotten back over the next few weeks and send them out via sea mail.

I will try to be of help to all of you in time to come with better service & quality. All I ask is your help in return.

= =

Ed. note: Mr. Koch of Bay stamps did a swell job on covers for this flight. Of particular note was the full color cachet of the Apollo-13 insigna printed on Buckland Park (W-16) and Apollo Bay. Also used were two other cachets illustrated on another page.

= =

The UCCC (Universal Cover Collectors Club)
Box 133
Glenelg, 5045, S. A.
Australia

Membership is open to USA collectors at $3. 50 . Covers available for Eldo, Woomera launches. Eldo covers are Multi-color(next covers June 1 or bit later) Send S. A. S. E. with an I. R. C. for more information.

TRADE & SELL

I have a list of all my duplicates in Space, Nuclear, FDC, FF, HPO & many more. Send #10 SASE for list. A stamp or two appreciated.

Bay Stamps - Box 133 - Glenelg 5045 S. A. - Australia. Wants as many as possible of the recovery ship covers for Apollo- 11 to 13. Hand cancel preferred. Will buy or exchange.

- -

SHORT NOTES

The last minute addition to the recovery fleet in the Pacific, USS Granville Hall (YAG-40), is a Liberty type ship launched Oct. 24, 1944. Since 1962 she has operated off Hawaii carrying on experiments in ship operation, protection & scientific warfare.
It is doubtful if any covers exist from her for this flight. Thre is a possability she made up covers, if so not many.

~~I I I

- SHORT NOTES -

For those not receiving the supplement to the Tracking Station List in the Apollo-12 "Dish", or not receiving one from me, may send a stamped addressed envelope requesting "supplement #1" from Bob Ekas - P. O. Box 146 - Chicora, PA 16025.

Some people who sent to me for the list of tracking stations may not have received it. This is because either they forgot to send the #10 envelope S. A. S. E., or did not send the 10¢. If you did not receive yours that you sent for, what did you do wrong?

/ /

On March 25th an agreement was signed in Canberra, Australia between the Australian and U. S. governments to extend for ten years the agreement under which all U. S. NASA tracking activities are conducted.

A new 210 - foot diameter antenna for deep space tracking will be established at Tidbinbilla (D-4), Australia.

/ /

- NOTES ON COVERS -

M-9 A different and very nice cachet.
M-12 Still stamping old address on back of covers.
W-6 & R-2 Had covers postmarked AM, which is OK Stations in the west had AM at time of launch on the 11th.
T-8 New cachet - words added "critical burn".

About 30 different stations were reported in addition to the regular. Most of these however were from observatories around the world. this is another good source of covers.

Cover also reported from the Mexican communications station. Postmarked at Tulancingo on April 15th. Cachet applied with return address. Marking reads "Mexican Estacion Terrena"

/ /

If insurance is any criterion, flying to the Moon is less hazardous than driving from one American city to another. The Apollo-11 capsule for example, carried astronaauts Armstrong, Aldrin and Collins to the Moon and back without mishap, and without a cent of flight insurance. But in its year-long tour of the nations 50 state capitals, this same vehicle will carry a $10 million liability insurance policy, underwritten by Fireman's Fund American Insurance Companies of San Francisco. The spacecraft carries an additional $100,000 policy to cover any necessary repairs. This applies to external refurbishings, does not include the internal "flight hardware". Apollo-11 travels by a special tractor-drawn trailer to each state capital, will move by ocean vessal to Alaska and Hawaii.
