THE DISH

Apollo 17

THE DISH

PUBLISHED BY: Bob Ekas, P.O. Box 295, Chicora, PA 16025 after a manned United States space flight.

****

Once again a United States space flight, Apollo 17, has been a success. After a delay of approximately three hours, blast-off was at 12.33 AM on December 7th Eastern Standard Time. Recovery was made in the Pacific by the USS Ticonderoga CVA-14 after a spash-down December 19th at 2:24 PM EST.

As I write this many covers have not come in but should be received shortly now that splash-down has occured. I try to get THE DISH printed and to you as soon as possible with the most information available about covers received from the stations and ships taking part in the flight.

Now, since the Apollo program is completed, many say the US space program is over in this century. This is not true as manned flights will be made for Skylab and in 1975 the USA-USSR hookup. In the meantime many space flights will be taking place and collecting covers for these events will be just important and interesting as the manned space flights in the past. Many of these flights are the forerunners to the manned flights in the future Many flights will be made for testing of the space shuttle vehicle as will probes of the planets before man can land on foreign soil.

At this time I am planning on putting The Dish out two or three times for the Skylab program. I would appreciate suggestions on when you think these should be printed. As far as I can figure this is the way the Skylab launches and recoveries will take place. The ATM or work shop will be launche first and one day later the Command Module with astronauts will be launched. In 28 days the astronauts will return to earth and approximately 62 days later the second Command Module with astronauts will be launched. The second group of astrounts will return to earth 56 days later and approximately 34 days later the third group of astrounts will go to the Skylab. The last group will stay for 56 days before returning to earth.

My suggestion on this would to issue The Dish after each group of astronauts returns to earth. I would appreciate any other suggests on this and any suggestions how to make The Dish more interesting.

This is one item I do not like to bring up. Since the cost of everything is going up, I must increase the cost of The Dish to 35¢ per issue. I do not intend to make a profit from The Dish. For the Apollo 16 issue a profit of 86¢ was made and for this issue I am sure this will be used. For forty some hours put into The Dish I do not count.

Those sending an 8¢ stamp along with 25¢ in advance will find the 8¢ stamp returned. For those sending a little something extra, it is very much appreciated and can be used as gasoline money for the running around involved.

Will appreciate hearing from more people with information for The Dish on what you have for sale or trade and other information of interest to space collectors.

At this time I am thinking of a new mimeograph machine that will do an A-1 job along with making the printing much easier. This should be in operation for the Skylab issue if not before.

Must close for this time and hope to hear from a great-many-of you with information for The Dish.

GOOD COLLECTING

Sincerely,

Bob

COMMENTS ON APOLLO 17 COVERS

Good co-operation from X-19 as they didnot take part in Apollo 17. Note received to this effect and covers were being sent to Norfolk.

How about the nice letter from N-5 on the part played in the space flights. A little advertising also enclosed and all appreciated.

Have a report from one collector, November 17th, as receiving cover back from the Caracol Astronomical Observatory, Mexico. Am wondering if the returned note is from some "nut" out in the sun or away from civilization to long. This is what he wrote, "We are living on a same Earth, everybody has the same organs in his bodies we do more or less the same, so, we must to be brothers. No Wars, No Fights, !No Death! we have to live in Peace because !We are brothers!

A-4 covers autographed on the back by Station Director, Communications Manager and ARIA Controller.

How about the C-1 slogan cancellation and the T-43 observatory postmark.

Stations C-25, C-48 and D-5 placed airmail stickers on covers and they were returned by airmail. C-45 placed a TB seal on covers. C-67 added more postage and airmail sticker. M-8 a beautiful printed cover with filler giving description and history of the station.

Had been informed by the Smithsonian Headquarter the O-7 Spain station was closed. Covers sent for Apollo 14 and 15 were returned for the Apollo 17 flight.

Postcard of Earth view enclosed in cover from T-61.

Cover sent to C-54 returned unserviced with outer envelope postmarked the USS Ticonderoga, stating cover received after November 1st deadline.

A-3 returned cover, serviced, in another envelope by airmail from the Western Test Range.

T-33 return address in English and French.

Covers sent to the NASA station Titusville address came back with (M-2) Kennedy Space Center cancel and cachet.

Had cover returned from R-7 not cancelled but had 8¢ postage due. Since proper postage was applied I refused to pay and postal clerk was kind enough to give me cover, although it is worthless. For Apollo 16 had three covers returned from Australia with postage due and no two had the same amount due. Through my postmaster checking and it was found the postage due was applied in Australia and the amount in the United States. These covers also had correct postage as the R-7 cover.

For C-57 I had a friend in Germany send a cover for me that way postmarked on the day of Apollo 17 launch. I also sent cover and it is illustrated on the pages showing different cachets received on covers. Inside this cover was a letter giving an explanation of the letters; DFVLR - DEUTSCHE FOR* SCHUNGS- UND VERSUCHSANSTALT (PORZ-WAHN/KOELN) FUER LUFT-UND RAUMFART GSOC - GERMAN SATELLITE OPERATION CENTER (O-PFAFFENHOFFEN/MUENCHEN) ZDBS - ZENTRALE DEUTSCHE BODEN-STATION. Since I also collect covers for other space flights a note was in the corner of letter stating my other cover had been received and will be serviced for the GRS A-2 flight.

As you probably know Ralph Cron is no longer at (E-3) Grand Turk and Joe Frasketi has left the space program. Another of our great helpers is leaving, Mrs Mason of (S-6) Madagaswar. The past several years Mrs Mason has taken good care of our covers from Madagascar. Have been informed by Mrs Mason a fellow interested in philatelic will take over the job of handling our covers Since this fellow is one of the station personal he will have to have co-operation by having covers stamped as he can't go to town for stamps as

Mrs Mason was able to do. I will try to find what this fellows collecting interests are and we maybe able to give a hand.

How about the cover from C-55 with the postmark cachet and words shown on another page. Inside cover was the following message signed by the Commanding Officer, "POSTMARK ONE DAY LATE DUE TO INTERNATIONAL DATE LINE".

Am wondering how may received cover from X-5 under separate envelope. Since cachet was late in arriving cover was postmarked and cachet applied later. Cachet and extra postage was paid for by one our philatelic friends. When sending covers to X-5 in the future how about sending a little something in stamps am sure will be appreciated. Make sure you send to James Seevers at this addresses.

As usual C-5 has done a super job with covers and have enclosed a postcard with the view of the station.

How about covers returned from X-13 with a letter giving details of the station and other information. This is not only with the Apollo covers, but covers serviced for other launches.

As of this writing have not had a report of covers from Seychelles E-6. In October have a report of E-6 returning covers with a note they are not OL 9 but is AFSCF Det 4 and they do not take part in Apollo.

I understand the T-80 address of the Cerro Tolelo Observatory in Chile will not be completed until 1973-74.

****

SKYLAB COMMUNICATION NETWORK

Over the past few months have checked on information for the Skylab program. One list typed up but do not remember where the information came from is listed as, SKYLAB COMMUNICATION NETWORK. Stations listed are M-1, M-3, M-4, M-5, M-7, M-8, M-9, M-10, M-12, M-13, S-10, NASA Merritt Island Station (cover cancelled from M-2 for this station) and the USNS Vanguard T-AGM-19.

Have a letter from NASA Headquarters, Washington, DC and listed is above stations except S-10, but in place is M-6 Newsfounderland. This letter also states, "The network stations formerly associated with the MSFN will continue to provide support to the remaining Apollo and Skylab missions". This letter also goes on to say, "These stations include 11 prime land stations, 4 instrumented aircraft, and 1 instrumented ship".

****

COVERS RECEIVED FOR APOLLO 17 WITH MESSAGE

S-8 Request not to send covers anymore.
D-4 Closing and a nice letter received to this effect.
T-14 Request not to send covers as they cannot co-operate further
T-51 Still getting advise to change address to CENTER OF ASTROGEOLOGY.
T-26 Note on back of cover they do not take part in Space Program.

MORE ON APOLLO 17 COVERS

Covers returned from C-41 inside a government envelope.

Camden AOE-2 covers returned from the Ticonderoga CVA-14

Shown on the cachet pages is the hand cancel of the Ticonderoga. Note the one in 19 is almost directly under the E. In other hand cancels the one is under the D.

As you probably know by this time S-4 has closed. More will close or mergers will take place by the end of Skylab.

Although covers from T-23 have a poor postmark they do cooperate. Past several covers received was typed on filler "With our compliments*Director and etc with autograph".

Covers from W-11 had the following wrote on front, "This letter Flew 2 Wx* Recon mission in splashdown Area 17 & 18 Dec 72* We-135B 12671* 55 WRSQ McClellan AFB* Robert B. Vaeyhen A/C

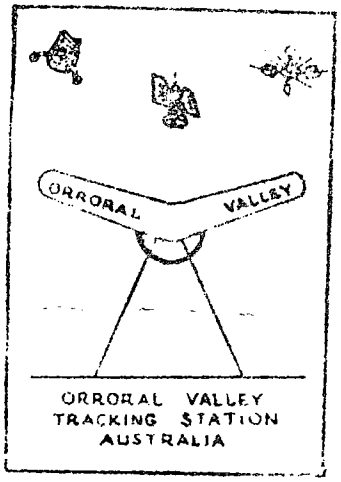

Need addresses of ARIA in Liberia, Puerto Rico and Fiji Island.

Covers from Bochum (T-9) indicated a bad storm and observatory was damaged. No tracking for a while until damage is repaired.

For Tuslog (A-5) they would like covers with stamps of Turkey applied.

****

On the enclosed pages are cachet, postmarks or other marking on covers for the Apollo 17 flight. If a station or facility had the same cachet or marking as for Apollo 16, I didnot show. Some covers returned with the same cachet as Apollo 16 but had some other marking is the reason they are shown.

TRADING & SELLING CORNER

Many Apollo 16 tracking station covers, reasonably priced, also some from Apollo 14 and 15. Will consider trading for X-15 covers, 1959 thru' July 1962, also Lifting Body covers 1966 thru' 1970. Many Manned, Unmanned launch covers, autographed, (U.S. & Russian), Harry Rose, 283 S. Aldine, Elgin, Ill., 60120.

The following covers have the commemerative cachet from the station in Spain listed.

DSS-61 Robledo de Chavela (D-6)

Apollo 7....$2.00	Apollo 8....$2.00	Apollo 9....$1.50	Apollo 10..$1.50
Apollo 11...$1.00	Apollo 12...$1.50	Apollo 13...$1.00	Apollo 14..$0.80
Apollo 15...$0.80	Apollo 16...$0.80	Apollo 17(printed $1.00	(R/S..$0.80

Mariner IX insertion into Mars orbit.....$0.80 (Apollo 17 Spashdown)
Pioneer F(10) launch date.....$0.80 Canary Island M-10
Pioneer F(10) fly-by Asteroid Belt.....$0.80 Apollo 17 (rubber stamp) $0.80

STAD (before MSFN) (M-9)
Apollo 16 (printed cover).....$1.00
ERTS-A.....$0.30
ITOS-D.....$0.30
Apollo 17 (printed cover).....$1.00
Apollo 17 (rubber stamp).....$0.80

NASA Communications (C-44)
ERTS-A.....$0.80
ITOS-D.....$0.80

DSS-62 Cebreros D-7
Apollo 17 (rubber stamp).....$0.80

Order from: Jose M. Grandela, Apartado 35088, Madrid-17, Spain

---

For sale or trade are Space and Historical local post covers from Ascension and Grand Bahama tracking stations. (Ibelieve this is for past events)Send stamped addressed envelope for details and also recent local post service. Joseph J. Frasketi, Jr., P.O. Box 484, Ft Myers, FL., 33902

BOW WOW Local post covers for Apollo 17, Launch-Kennedy Space Center; Moon Landing-Moon Ky; Recovery-Cape Canaveral with Bow Wow Local Post cancel. Send stamped envelope for inquiry to Leonard I. Sandler, 6930 Brookmill Rd., Baltimore, MD 21215.

A letter last July from Rand Stamps, P.O. Box 9, Skeerpoort (Tvl), South Africa indicating covers are still available for past Apollo flights. Covers are $0.25 South Africa (approximately $0.34 USA) plus postage. Orders in singles or multiple dollars are preferred. Please allow for exchange rate if Internation Bank Draft is mailed. For single covers mint stamps accepted.

Have a few duplicates from the last three Apollo missions to trade. Interested in purchasing from earlier missions. Mark P. Hreben, 4408 California St., Dickinson, Texas, 77539

APOLLO 17 COVERS REPORTED

This listing is not of stations taking part, but only a record of covers reported. All covers postmarked December unless with another month and date.
